

Welcome future AWC customer,

How this begins is we try to let the customer design his own watch. We do this by starting with a customer's image of something he likes, and then the process begins. To start, the customer needs to put in a 50% deposit of the original quote. If you decide to upgrade, you will get a new balance that reflects your upgrade's.

AWC will provide mock-ups for the customer to see different options available including hands, dials, movements, etc. before pressing or assembling, so you are totally involved in designing your own custom watch. Sometimes it's a different design than the original concept.

Build time depends on necessary parts ordered for your watch. If parts are available- 1-week normal delivery. If parts need to be ordered- 2-3 weeks to complete.

Method of payment: PayPal (chucklofthouse@yahoo.com).

Thanks for the interest...

-Chuck
